

Warehousing and Order Fulfilment Services

- **Order Handling and Processing**

Our order processing system and warehouse capacity ensure orders are shipped within 24hrs and in most cases the same business day. Our toll-free support line helps with your inquiries or order requirements.

- **Pick and Pack Services**

At Central Purchasing, we can store custom order items or prepaid products supplied by credit unions in our warehouse. This allows us to manage inventory, pick & pack and distribute materials directly to each credit union and branches at the same time as their regular supply orders to help minimize additional shipping costs.

- **Distribution**

Organized, Efficient & Reliable – Almost as though you own your own warehouse! With a thorough understanding of your products and the needs of your credit union, we treat your items as we would treat our very own; ensuring your branches receive the quality product they order.

- **Product Storage**

We manage our own warehouse space, store products on behalf of credit unions, distribute inventory, and manage inventory levels of these products.

- **Reporting**

We offer various custom reports to suit your individual requirements. Some of our reports include usage reports, and reports of your products held in our inventory. Do you need to know the last time one of your branches ordered a particular item, or how often an item has been ordered over the past year? We can help!
